Mushroom Maintenance Cycle

1st year

Preparation
Capacity related to size of mushroom house is:
1000 bags = 2m x 3m (6m²)
2000 bags = 3m x 4m (12m²)

Buy Mushrooms
Purchase the already prepared sawdust mushroom bags with mycelium already formed.

Mushroom Growing / Harvesting
During the 1st week mushrooms will begin to grow, mushrooms will continue to reproduce each week for up to 6 months.

Mushroom Collection
Collect mushrooms when they are young as buyers prefer to purchase young mushrooms.

Clean Mushrooms
1 time per month)
Remove contaminated bags that have not produced spawns.
Check for mites and other pests.
Remove bad mushrooms from the bags.

Time for Selling at the Market
As spawns continue to reproduce you can sell in the market for a period of up to 1 month.

Other Information
Watering: Mushrooms should be watered 1-2 times per day using a water spray depending on the humidity e.g. if the mushroom house is very dry they may need to water 2-3 times per day, and in rainy season they might not need to water at all.
